

WVRA Wednesday Night Net

Preamble

Good evening. This is [____], and my name is [_____]. I will be tonight's Net Control Operator. Welcome to the WVRA Wednesday Night Net of the 147.135 and 146.865 repeater system. This is a weekly net providing a meeting place for Amateur Radio operators interested in buying, selling or trading amateur radio equipment or related items. In addition, questions, comments, or discussion regarding the technical aspects of Amateur Radio are welcomed and encouraged. Following check-ins and announcements, we will have the ARRL Audio News.

There will be periodic breaks to allow other stations or emergency traffic to use the repeaters. If emergency traffic comes on any system, the net will cease immediately and remain on standby until the emergency situation has been resolved.

When you check into the net, please give a full exchange of call. That is, my call, [_____] followed by your call, then announce if you have traffic or no traffic. I will now accept check-ins for the net. Please call [_____]

Local Announcements – Club meetings, Events, Swapfests, etc

Mid-Net Promotion

Besides the 147.135 / 146.865 system that we are using for this Net, the WVRA also sponsors analog, digital and data systems on various bands from 10 meters through 440 MHz. In the interest of experimentation, occasionally new systems are brought on line so stay tuned for the most recent developments. For more repeater information, please visit WVRA CLUB DOT ORG. All repeaters normally require a PL tone of 114.8 but are open repeaters. You are invited to join us at our monthly meetings on the first Tuesday of the month at 6:30pm. An amateur radio operators license is not required for membership. Anyone interested in amateur radio is welcome. Meetings are held at Rasmussen College, located at 1101 Westwood Dr, in Wausau.

Play ARRL Audio News if available
